

Eirik Christiansen

IT Administrator & Systems Integrator

Hamburg-based IT administrator focused on Microsoft environments, infrastructure, PowerShell automation, and system integration. I connect tools, APIs, and data sources so processes become more stable, transparent, and easier to operate.

Hamburg & Remote

German / English

[linkedin.com/in/eirik-christiansen](https://www.linkedin.com/in/eirik-christiansen)

Focus areas: Microsoft 365, Active Directory/Entra, Windows, networking, helpdesk, PowerShell, n8n, Power Automate, Python, Shell, SQL/MySQL, and APIs. I have worked with AI workflows and agents since 2020. SAP Business One technology has been a growing practical field since April 2025, framed through an admin and infrastructure lens.

EXPERIENCE

APR. 2025 - TODAY

SAP IT Consultant, Be1Eye GmbH

SAP Business One technology, IT infrastructure, security, process automation, and technical framing of ERP topics from Hamburg and remotely.

- SAP B1
- HANA/SQL
- Support
- Automation

OCT. 2021 - APR. 2025

IT Systems Administrator, Reos GmbH

Active Directory, Microsoft Outlook, Windows Server, networking, hardware, operating systems, helpdesk support, and operational IT during a dual study program.

- AD
- Windows Server
- Outlook
- LAN/WAN

EDUCATION

OCT. 2021 - MAR. 2025

B.Sc. Computer Science, IU International University

Final grade 2.2. Bachelor thesis on automated onboarding with NFON, Microsoft 365, Keeper, automatic laptop setup, and Snipe-IT.

SEPT. 2012 - JUN. 2021

Abitur, Schloss Torgelow Private Boarding School

Final grade 2.4. Sept. to Dec. 2017: Kingham Hill School in England as part of my school path.

SELECTED INTEGRATIONS

BACHELOR THESIS

Automated onboarding

Connecting NFON, Microsoft 365, Keeper, laptop setup, and Snipe-IT into one controlled joiner process.

SAP B1 / API

Making ERP data operational

Business partners to telephony, SAP B1 to Mailchimp, and SAP B1 appointments in Outlook with clear mapping and data minimization.

Core profile

- Administrator and integrator, not a pure developer profile
- Microsoft environments, identity, workplace, and operations
- API integrations with logging, mapping, and failure paths
- AI agents, knowledge sources, and assistance systems since 2020

Stack

Microsoft / Identity

M365, Entra/AD, Outlook, Windows, Graph

Infrastructure

Windows Server, LAN/WAN, hardware, helpdesk

Automation

PowerShell, n8n, Power Automate, Python, Shell

Data / APIs

REST APIs, SQL, MySQL, HANA, reporting

Best practice

- Define one leading system for each data field
- Build jobs idempotent, logged, and repeatable
- Use least privilege for API and automation accounts
- Move only the data that genuinely serves the process
- Plan retries, queues, and manual approvals from the start
